Professional Summary

Senior Software Engineer with 7+ years of experience designing, modernizing, and delivering enterprise systems, SaaS platforms, financial applications, and full stack products. Strong background in software architecture, legacy modernization, system integration, and production support, with practical use of AI-assisted engineering workflows including Claude, MCP, prompt engineering, local LLMs, and AI agents to accelerate delivery without compromising maintainability.

Core Expertise

- Software Architecture
 - Enterprise Systems
 - Full Stack Development
 - REST & GraphQL APIs
- AI-assisted Software Engineering
 - Legacy Modernization
 - System Integration
 - Technical Leadership

Technical Skills

- Languages:** TypeScript, JavaScript, PHP, C#
- Backend:** Node.js, Express, Laravel
- Frontend:** Vue 3, React, TailwindCSS, Vite
- APIs:** REST, GraphQL
- Databases:** PostgreSQL, MySQL, SQL Server
- AI:** Claude, MCP, Ollama, Prompt Engineering, AI Agents
- Tools:** Docker, Git, Linux, Azure DevOps, Jira

Professional Experience

- Senior Software Engineer**

Brive Soluciones | Full-time | Mexico | Remote

Jan. 2026 - Present

 - Modernize legacy systems and integrate new platforms across enterprise software environments.
 - Apply Claude, MCP, prompt engineering, and AI agents to orchestrate legacy-to-modern migration work.
 - Design maintainable modules and custom software while keeping architecture decisions grounded in production needs.
- Software Engineer**

Intelligential® | Contract | Mexico | Remote

Dec. 2025 - May. 2026

 - Maintained and extended production software systems through new modules and custom feature development.
 - Supported existing platforms with disciplined engineering practices across delivery, fixes, and system continuity.
- Senior Software Developer**

Pigui | Contract | Mexico | Remote

Jun. 2025 - Aug. 2025

 - Continued development of an AI product directly with the client after the initial product phase.
 - Delivered Shopify API integration for product synchronization and a complete product onboarding flow.
 - Refactored the codebase while adapting to a strategic pivot and preserving critical delivery milestones.
- Senior Software Developer**

Zarape Code | Full-time | Mexico | Remote

Jun. 2024 - Jun. 2025

 - Led end-to-end MVP development for an AI product using Node.js, Vue 3, TypeScript, REST, and GraphQL.
 - Designed system architecture, implemented Figma-based UI, and integrated local LLM workflows with Ollama.
 - Delivered third-party library and API integrations while refactoring the codebase to limit technical debt.

Senior Software Developer

Lovlisoft | Freelance | Queretaro, Mexico

Jun. 2023 - Mar. 2024

- Led technical delivery for a group-loans financial platform built with Laravel and Vue.
- Managed Jira work, developed features, resolved defects, and supported code quality across the team.
- Provided technical guidance that improved delivery clarity, operational efficiency, and platform reliability.

Senior Frontend Developer

Grupo Icarus S.A. de C.V. | Freelance | Queretaro, Mexico | Remote

Aug. 2022 - May. 2023

- Led frontend delivery for React, TypeScript, TailwindCSS, and Vite work based on Adobe XD requirements.
- Coordinated user stories, sprint planning, code reviews, and troubleshooting for quality implementation.

Full Stack Software Developer

Intelligential® | Full-time | Queretaro, Mexico | Remote

Oct. 2021 - Aug. 2022

- Built modules for a financial SaaS using Vue.js, Node.js, Express, GraphQL, and PostgreSQL.
- Integrated API services, implemented business logic, fixed bugs, and improved application performance.

Full Stack Software Developer

Grupo Icarus S.A. de C.V. | Freelance | Queretaro, Mexico | Remote

Jan. 2021 - Oct. 2021

- Led full stack delivery for a Vue.js and Laravel web project, covering requirements, UI/UX, APIs, performance, and client coordination.

Frontend Web Developer

Epix Industries | Part-time | Queretaro, Mexico | Remote

Apr. 2021 - Aug. 2021

- Developed Vue.js interfaces for NFT art websites and application UIs, integrating Three.js 3D experiences in an English-speaking international team.
